

# BLTS FORMAT SPECIFICATIONS

Following *Braille Formats 2016*

The following pages demonstrate the method of preparing transcriber-generated (**t-pages**) and preliminary (**p-pages**) for general reading and textbooks. Although it does not begin to cover the variety of considerations the transcriber faces with each new book, this guide can serve as a BASIC MODEL. Carefully study section 2 of *Braille Formats 2016* for additional textbook requirements.

## ORDER OF PAGES

Braille as a list (1-3 margins) in 5 sections with at least one blank line separating each section.

When there is not enough room on the Title Page, publisher's address and/or website, Further Reproduction statement, printing history and proofreader may be taken to the following supplement title page.

If there is a series name, edition name or number, grade or reading level, add them to section 1 - on separate lines if possible, or separated by semi-colons. See Braille Formats 2.3.4

When there are more than 3 author's names, or not room for all on the short title page, list first name followed by "et al." Take others to next (supplemental) title page. Do not italicize "et al." Use grade 1 indicator before "al."

The printing history should follow ISBN, but if there is not room, take it to the next page (supplemental title page).

---

P-pages begin here, on an odd-numbered page.

Braille all other p-pages in the same order as they appear in text.

Ignore advertising on the book jacket.

Including reviews and accolades is the transcribers option. If you do not include them, state so on the Transcribers Notes page. Story summaries, and if included, reviews, accolades, etc., should be placed at the beginning of the p-pages in the first volume only. Do not include them in textbooks. Place specific materials such as maps or charts that are needed throughout the book at the beginning of each volume — or at the beginning of those volumes requiring them.

## DEDICATION

Example:

---

Regardless of print placement, a dedication is placed on its own page starting on line 3 (assuming a running head). 1st volume only.

Use standard paragraph formatting (indented or blocked), or poetry format if needed.

In this example, this is the first print page number used, but there have been four preceding pages without numbers. The implied page numbers must be included on line 1 of the braille page.

Print page numbers go at the end of line 1. Braille page numbers at the end of line 25.

Do not add a heading, such as DEDICATION, if there is none in print.

The entire book's table of contents is brailled in Volume 1 only. The contents page of each subsequent volume lists only the contents of that volume.

Headings not in print (Volume 1, Volume 2, etc.) must be enclosed in transcriber notes symbols. These headings are centered — preceded, but not followed, by blank lines.

Page numbers are the print page numbers. Do not include continuation letters.

Contents pages on odd-numbered braille pages (those containing braille page numbers) may not contain any text on line 25 other than the braille page number.

The main body of the book begins with the first item listed on the Contents page (in this case, the introduction). If there is no contents page, begin the first page of narrative (prologue, introduction, etc.) with braille page 1 (⠠⠑).

Start the first page of the body matter on an odd-numbered braille page.

On the first page of text of each volume, omit the running head and center the FULL title, subtitle (if any), and series name (if any).

Body matter pages begin with braille page 1 in each volume.

# BLTS Format Specifications

## Page Size

- Assume all work will be embossed interpoint (on both sides of the paper) with 40 cells to a line and 25 lines to a page unless instructed otherwise.

## Title Page

- Left-justify the information on the title page.
- All 40 cells may be used; runovers in cell 3.
- Distribute blank lines as evenly as possible between the sections of the title page.
- Follow print for capitalization of title and author. Use the word "by" only if used in print.
- If there is a website for the publisher it should be included on the line below the publisher's address.
- In the braille page information line, include t-pages and p-pages as well as regular braille page numbers. Include continuation letters.

## Blank Backs

The only blank backs required are:

- The back of the title page, unless there is a supplemental title page.
- The back of the last t or p-page, if that page is an odd-numbered page.
- Do not use a running head or page number on blank pages.

## Running Head

- Place a running head on every page, with the exception of the title page, the first page of body matter, and blank backs.
- Follow print for capitalization of running head if possible.

## Page Numbering

- In control panel, select Do, then Page Numbering. Under Quick Setup For: select Interpoint Textbook
- Print page numbers are placed in the upper right corner on every preliminary and text page. Braille page numbers are in the lower right corner of every odd-numbered page. Do not put a braille page number on even-numbered pages. Look on the left of your screen to see if you are on an odd or even page.
- Each volume begins with braille page 1, placed in the lower right-hand corner.
- T-pages consist of the title page, special symbols page, and transcriber's note page. T-pages have only t-page numbers (⠠⠠⠠⠠, ⠠⠠⠠⠠, etc.) in the lower right corner of the odd numbered pages.
- P-pages begin on an odd-numbered braille page and are brailled in the order in which they appear in the book. P-pages have the print page numbers in the upper right corner of the page and p-page numbers (starting with ⠠⠠⠠⠠) in the lower right corner of the page.

- Body matter. The first page of body matter (text) in each volume begins on an odd-numbered page. If there is a table of contents, the first item listed is regarded as the first page of text. Text pages have the print page numbers in the upper right and consecutive braille page numbers, starting with ⠠⠠ in the lower right corner of the page.

### **Paragraphing**

- Follow print unless an entire text is printed in block paragraphs, in which case use indented paragraphs. List such a change on the Transcriber's Notes Page.

### **Word Division**

- When in print a word is divided between pages, follow print.

### **Volume Size**

- Maximum size for interpoint volumes is 150-160 braille pages. This includes the transcriber-generated and preliminary pages.

**Subsequent volume t-pages and p-pages** should include the Title Page, Special Symbols, Table of Contents and Transcriber Notes for that volume only.

### **Include in first volume only.**

- Supplemental Title Page
- Cover and Jacket Material
- Dedication
- Accolades/Acknowledgments
- About the Author
- Complete Table of Contents

For specific transcribing information for knit and crochet, cookbooks or print/braille books, contact the braille coordinator.

- Try to make all your volumes approximately the same size, but a logical breaking point is your first priority.
- Division should always favor smaller volumes.

### **End of Volume Indicators**

#### **Use TN indicators**

- END OF VOLUME 1, 2, etc.
- THE END

These should be centered and in full caps, there should also be a blank line before.

### **File Names**

- Save each volume in a separate file. Suggested file names are as follows:  
Ex.: The book *War and Peace*, in 10 volumes. Save as:  
War and Peace v1,  
War and Peace v2 and so on

### **Saving Your Work**

- Be sure to keep an up-to-date backup copy of your work at home, either on your hard drive or a removable storage medium
